Re: MCB Camp Lejeune; Response to North Carolina DEHNR
Comment on the Draft Interim RI/FS Project Plans for
Operable Unit No. 10 (Site 35)

Dear Mr. Watters:

This letter addresses the comment from Preston Howard, Division of Environmental Management, on the above referenced project. Navy/Marine Corps responses are attached. These comments have been incorporated in the Final version of the documents (issued by Baker on 11/22/93) which you should have already received under separate cover.

Any questions concerning these responses should be directed to Ms. Katherine Landman at (804) 322-4818.

Sincerely,

A handwritten signature in cursive script that reads "L. A. Boucher".

L. A. BOUCHER, P.E.

Head

Installation Restoration Section
(South)

Response to Comment Submitted by the North Carolina DEHNR
(Preston Howard, Division of Environmental Management)
to the Draft Interim Remedial Action RI/FS Project Plan
Operable Unit No. 10 (Site 35)
Marine Corps Base, Camp Lejeune, North Carolina
Comment Letter Dated September 29, 1993

Response to Comment

1. The comment is correct in that references to clean-up action levels refer to the recently published North Carolina guidelines (NCDEHNR 1993) which covers petroleum-related substances. Section 3.6 (Task 6 - Risk Assessment) has been modified to indicate that these guidelines are to be used to establish soil clean-up levels for TPH contamination. A quantitative risk assessment will be performed under the full RI/FS that will be used, in conjunction with EPA and NCDEHNR input, as a basis for establishing soil clean-up action levels for any non-TPH contamination, if encountered in the soil.
