8-3-83 ^{VICK} 1920 Reiff cabled and said the Elumbe
tank tele meter for Campbell street
tank was showing 17. It had not
gained since he had begun to work.
He checked pressures at tanks &
Campbell St. was 68 lbs & white St
58 lbs. The gauge in the plant was on
70 lbs. I told him to operate pump
by hand using normal operating
pressure - on gauge at the plant
which he said is around 62 or 63 lbs.

8-24-83 - Cassens called and said ~~the~~ Surge lost
power for a few hours. When he went to
put the out motor on it ran OK until
he put it under a load. The motor
would not stop it wanted to cut off. He went
ahead and cut the motor off.

8-24-83 - Riggs called at 1055 said the contractor
cut circulating pump off to fix system.
It was cut off around 1945 and said they
will be through at 2400. Will set system
back up. Campbell will check it every
two hours.

8-24-83 - 2345 - ph. worker at TT end.

8-25-83 0100 - Went to TT pool with E. Campbell. Contractor did
final completed work. While we were there the core worker stepped
on large grating at ladder - grating gave way due to poor fit
and man almost went into pit. He then contact employee
pulled grating so it would not give way but created a stumbling
hazard. Grating should be fixed immediately! (3P)

 the water is low. It's been reported to me that
 the manager lets the people open and close the
 valves on baby pool and it's causing the
 pool swimmers to drop level of pool and
 causing the pumps to brake suction and
 will burn pumps up. I suggest we change
 2206 locks because too many people has
 keys to our locks (swimmers)

Stune called at 2000 and said line backed up in drain line into the street at TT. I went over there and the line was from the center line of road up onto the grass for a half of a block. 8" deep. I stayed and help wash down street with $\frac{1}{2}$ " in fire hose. still didn't get it all. need to run pump in pit only 30 min. at a time and let rest for 1 hr. or will flood street again. the main pit is full of line, settled in bottom. (Connor)

9-17-83 - Assisted Campbell with clean up at TT 38.

10-9-83 - HB - Had problems with gun way valve for #2 of 2000 equipment, got it straightened out and then #1 of 2000 valve of equipment closed off. Had to put it on hand control. Problem went off and when it came back on I closed 2000 equipment valves and 2000 equipment up to 2000 seeds when response came off on 2000. But it seems to work again after that.

Campbell informed that the high pressure line valve on back wash line at TT would not open and that he couldn't work further. He said he would try to take it apart & repair it. Peterson took Rich's truck to TT so they would have good contact and take dust couldn't isolate the valve. Some belts will have to be cut off valve, decided plant would run until morning if line were secured. Called Mr. Price & he stayed running w/o line until morning. Charged call to 5988 (could not get dial tone on 5988 - TT phone will not ring Hatfield Telephone repair). SP

11-18-83 8.4 Check-in H. P. [unclear] TT. Reiff & Adkins

A.S. Sympson/Kellum RR. CNB: Wootan

11/18/83 Florida back in operation at 1000 AM.

11-19-83 HB - #1 filter closed off board
off lines, manual closed and left from
manual to auto, finally left it in
manual, then #2 closed off. Almost
did part off and went home. I turned
around with it some more than filters off
to high, switched to automatic. Seems
to be working again now 1900.

11-20-83 ⁽⁰¹⁰⁰⁾ WASH RATE ON #2 FILTER WOULD
NOT GO ABOVE 5.8 MG. I THEN HAD PROBLEMS
WITH EFF RATE OF CONTROL VALUES ON #1 & #2
FILTERS. ⁽⁰²⁰⁰⁾ STILL HAVING PROBLEMS #1 FILTER EFF
RATE OF CONTROL CLOSING SHUT + #2 FILTER
FILTER TAKING ALL OF THE WATER.

11-20-83 - Dinosaur Beach Heater still does not
work. A ticket was turned in.
