From: Commanding General, Marine Corps Base, Camp Lejeune, North Carolina
To: Commander, Atlantic Division, Naval Facilities Engineering Command, Norfolk, Virginia 23511-6287 (Code 114)
Subj: IN-PROGRESS REVIEW OF NACIP PROGRAM WITH NORTH CAROLINA OFFICIALS

1. Request your assistance in establishing an in-progress review in January with State of North Carolina environmental agency personnel and Camp Lejeune staff. A brief presentation by the NACIP contractor on work accomplished to date would be most helpful for this review. This should be followed by a review of NACIP milestones by Atlantic Division and Marine Corps Base staff.
2. Tentative date of 20 January 1987 has been established. Please advise us by 15 December if this schedule is acceptable so that arrangements for the review can be confirmed.
3. Mr. Alexander, MCB Environmental Engineer, will provide any further information you may need. He can be reached at Autovon 484-3034 or 484-3035.
