Dear Assistant Chief of Staff,

Would you please send me the results of the water samplings/surveys at Camp Lejeune, North Carolina that were conducted between 1980 and 1985? I have read that there were numerous other chemicals besides Benzene, Lead, 1,2-Dichloroethene, Methylene Chloride, Trichloroethylene and Vinyl Chloride. I have called other places to find this information and was told to write to you for help in obtaining these reports.

Thank you very much for your help. My address is: Gary Palmer

Thank you again,

Gary Palmer
