

Commanding General (ATTN: AC/s, EMD)  
 Marine Corps Base  
 PSC Box 20004  
 Camp Lejeune, NC 28542-6004

16 Sept 2000

SUBJ: Technical Document, Request For

CG, MCB ltr SO90 over 1832: LMB of 12 August 1991 forwarded to Environmental Science and Engineering Inc "Re Government Review Comments of MCB Camp Lejeune RIA Assessment Report for Hadnot Point". Subject document and enclosures is listed in the Admin Record at page 45 of 0301-09/12/91-00682.

Enclosure (1) on download is missing a massive number of pages and tables. I assume that enclosure (1) as a review commented only on selected sections which explains the missing pages and tables.

As a result of the review by both LMAUDIV and Baker Environmental of the draft I assume the HPIA Baseline RIA Assessment was later promulgated in a final form.

Two minor questions: (1) what/where are "Areas of Concern" 902, 1202, and 1602? Are these citations for HPIA structures/buildings 902/1202/1602? (2) what were the uses of the buildings noted during the period 1960-1985?

Respectfully Submitted,  
 Thomas A. Townsend  
 MAJOR, USMC (Retired)
