BEMD

Major Thomas A. Townsend, USMC (Retired)

30 JAN 2003

Dear Major Townsend:

This letter responds to your letter of December 30, 2002 to the Commanding General, Marine Corps Base (MCB), Camp Lejeune. We understand, share, and appreciate your concern for active and retired Marines and their family members and continue to support the Public Health Study undertaken by the Agency for Toxic Substances and Disease Registry (ATSDR).

We understand your letter to seek information regarding modeling technology and other technology-based assessment tools. Information responsive to your request may be found at MCB, Camp Lejeune's Installation Restoration (IR) Program administrative record at: https://www.bakerenv.com/camplejeune irp/default frameset.htm. Specific information related to the results of exposure and risk assessments and the modeling and other tools used to perform these assessments can be found within Remedial Investigation Reports for all IR sites. These portions of the administrative record provide a comprehensive discussion of the Department of the Navy's actions to investigate and remediate MCB Camp Lejeune's groundwater.

We hope this information is responsive to your questions regarding modeling technology and other technology-based assessment tools utilized by MCB, Camp Lejeune. For further information concerning the Public Health Study and evaluations undertaken by ATSDR in support of this Study, you should contact ATSDR directly. If you wish to request specific documentation

from MCB, Camp Lejeune we ask that you submit a written Freedom of Information Act (FOIA) request to the Camp Lejeune FOIA coordinator.

Sincerely,

SCOTT A. BREWER
Director, Environmental Management
By direction of
the Commanding General
