Dear Mr. Brewer,

I have written before requesting water sampling reports conducted at Camp Lejeune. I have yet to receive any information on these reports. I have gotten information about the studies that state there were numerous contaminants in the water, but all the contaminants were not listed. I was stationed at Camp Lejeune from 1969 - 1971. I would like the sampling reports from 1969-1985. I have written different places that supposedly are responsible for keeping these records, but so far they all have mysteriously disappeared. Under the Freedom of Information Act, I have a right to the information in these reports. I would appreciate any help you can give me to help clear up this mystery.

Sincerely,

Gary Palmer
