DEPARTMENT OF THE NAVY
ATLANTIC DIVISION
NAVAL FACILITIES ENGINEERING COMMAND
NORFOLK, VIRGINIA 23511

TELEPHONE NO.
444-7313
AUTOVON 690-7313
IN REPLY REFER TO:
114:PPC
6280
7 SEP 1978

From: Commander, Atlantic Division, Naval Facilities Engineering Command
To: Commanding General, Marine Corps Base, Camp Lejeune

Subj: Leachate from solid waste and chemical landfills; monitoring of

Ref: (a) 40 CFR 241, Guidelines for Land Disposal of Solid Waste
(b) 40 CFR 257, Criteria for Classification of Solid Waste Disposal Facilities
(c) FONECON MARCORB CAMP LEJEUNE (Mr. J. Wooten)/LANTNAVFACENCOM (Mr. P. Cunanan) on 18 Aug 1978

1. References (a) and (b) require that land disposal facilities be designed, constructed and operated in a manner to protect groundwater from leachate contamination. In the Camp Lejeune area, groundwater is used extensively as a potable water source. Thus, current land disposal facilities should be monitored to indicate, as early as possible, any movement of contaminants from either disposal facility into the groundwater. Monitoring is necessary to evaluate either the potential danger to or the impact on groundwater quality.
 2. During reference (c), the Marine Corps Base, Camp Lejeune was requested to provide the following:
 - a. Information for each test well at chemical and solid waste land disposal facilities to include: geographical location; top of well elevation; ground elevation; and water elevation in well or distance to water surface as measured from top of well.
 - b. Water samples (1 liter) from each test well.
- The information and water samples should be forwarded to:
Commander, Atlantic Division, Naval Facilities Engineering Command,
Norfolk, VA 23511, Attention Code 114.
3. Question regarding this matter should be directed to Mr. P. Cunanan, Code 114, AUTOVON 690-7313.
