8-31-85 - 1815 - Sewage plant operator said he had found
a leak in 6 in water line at final effluent. He said he had
notified emergency maint. I called Marshall and he stated
he couldn't notice a pressure loss. Mr. Park from Sewage called
back and said he couldn't reach his leader or Davis so he had
called Mr. Price. He said Emergency maint. had not checked
out leak yet. I went to Bldg 22 and the operator took me
to the leaks. One leak is at a coupling - the other leak is
underground. When I looked it appeared to be losing about 100 GPM
but Mr. Park stated it had gotten worse since he first saw it. I
returned to 670 and notified Mr. Price [REDACTED] (Chicago
451-5988) I followed his instructions. Mr. Terry Yapp [REDACTED]

~~649~~ well home has been locked by
C.P.-6 and we can't get in. (N.L.)

9-15-85 - Wells cut off approximately 0500. I noted that
the rainwater meter should have still had water coming
to the plant. I went up and checked the aquatics and there
was no flow. Lights on board showed showed lime
feeder, lime pump and other necessary equipment still
in operation. Checks to see if flow pointer was hung and
turned off necessary equipment. Checked fuses on meter ^(ok) and
looked for obvious problems. Checked Chlorine room and
found Chlorinator still feeding. Turned off valves at Cyclinder
Counter on raw water meter still showing water flow.
Turned off Thru wells but it made no difference. 0730 - Called Mr.
Frazelle to see if he wanted Vick to come in - He said to
tie pointer back.
