

My father was a corporal at Camp Lejeune; he worked in transportation at the motor pool. I was born there in 1966. Eleven years ago my father was diagnosed with cancer- I am unsure what the exact name for it was. I do know that it started in his kidneys. He has been gone for 10 years now. They could not find any reason for his cancer; it was not hereditary. In 1971 my mother was pregnant with my little sister. When my sister was born my mother almost died from a very large tumor that had to be removed. My brother, sister and I all suffer from severe migraines. I had to have my uterus removed in my 30s. I have to find out just where we lived down there. I think it was in Midway trailer park.

About a year ago my mother asked me to do a search for one of her best friends that lived down there when we did. I found her and she recently sent my mother an article about this since she knew how my father had died.
