BEMD  
25 MAR 1998

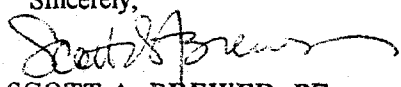

Mr. David Lown  
North Carolina Department of Environment  
and Natural Resources  
Superfund Section  
P. O. Box 27687  
401 Oberlin Road  
Raleigh, North Carolina 27611

Dear Mr. Lown:

The following is a written notification referencing the phone conversation between Mr. Mick Senus and yourself on March 13, 1998. Marine Corps Base (MCB), Camp Lejeune would like to provide notification to you that effluent from the Lot 203 Groundwater Treatment Plant (GWTP), at Installation Restoration (IR) Site 6, exceeded discharge limits for Tetrachloroethylene (PCE) during the February 1998 monthly sampling event. Enclosed is a letter from our contractor, OHM Remediation Services, Corp., which outlines the discharge concentrations and action taken to date to rectify the situation.

The February 1998 monitoring results indicated PCE at 61.5 parts per billion (ppb) on February 27, 1998 and later, a confirmation sample on March 9, 1998 that indicated PCE at 13.6 ppb. The GWTP at IR Site 6 is designed to suspend any discharge to less than 0.8 ppb. As OHM's letter indicates, the plant has been shut down as of March 6, 1998 and they have since taken action to correct the problem. Lot 203 GWTP is expected to start up again in approximately three weeks, after proper maintenance to the system is complete.

Point of contact is Mr. Mick Senus, Installation Restoration Division, Environmental Management Department, at telephone (910) 451-5068.

Sincerely,  
  
SCOTT A. BREWER, PE  
Deputy Assistant Chief of Staff  
Environmental Management  
By direction of  
the Commanding General

- Enclosures: 1. OHM Remediation Services Corp. letter dated March 11, 1998  
2. Groundwater Treatment Plant Monthly Monitoring Results for February 1998
