October 21, 1992

Mr. George Radford  
Installation Restoration Program  
Environmental Management Department  
Building 1, MCB Camp Lejeune  
Camp Lejeune, North Carolina 28542-5001

Dear Mr. Radford:

Thank you for your assistance in setting up the site visit by the Agency for Toxic Substances and Disease Registry (ATSDR) to Marine Corps Base Camp Lejeune. The purpose of this trip is to supplement information gathered on the previous site visit for the health assessment of Marine Corps Base Camp Lejeune.

As discussed in our telephone conversation, I scheduled the trip during the week of October 26-30, 1992. A site visit typically includes a tour of each NPL site, meetings with installation activity personnel, and a review of documents in the administrative record for the NPL site. An inbriefing and/or exit briefing with appropriate installation officials can be done, if needed. I will leave the itinerary scheduling to your discretion. ATSDR will combine the information gathered on-site with input from concerned citizens, and local, state, and federal agencies, and include the information in the health assessment.

Please let us know if security clearances and camera clearances are required. Dr. Leticia Arredondo, an ATSDR Medical Officer, will accompany me. Local, state, and other federal agencies will be informed of our site visit and may wish to accompany us.

Please call me at 404-639-6070 or send a fax 404-639-6075 to confirm the arrangements. I appreciate your assistance and look forward to working with you.

Sincerely yours,

Stephen S. Aoyama, P.E.  
Environmental Engineer
