Contract Task Order (CTO) 0352  
Long-Term Monitoring Work Plans  
Operable Unit No. 2 (Sites 6 and 82)  
Operable Unit No. 5 (Site 2)  
Marine Corps Base Camp Lejeune, North Carolina

Dear Ms. Landman:

I am pleased to submit on behalf of Baker Environmental, Inc. (Baker) two copies of the Long-Term Monitoring Work Plans for Operable Units (OUs) No. 2 and No. 5 at Marine Corps Base (MCB) Camp Lejeune, North Carolina. Two copies have been forwarded to Mr. Neal Paul at MCB, Camp Lejeune. Copies have also been distributed to Ms. Gena Townsend (USEPA Region IV) and Mr. David J. Lown (NC DENR).

The work plan for OU No. 5 is a complete replacement version, based upon several modifications to the monitoring program. The updated work plan includes information regarding each of the implemented modifications; additional details regarding the modifications have been presented in previous monitoring reports. The work plan for OU No. 2 provides an initial framework of monitoring activities to be completed quarterly. Based upon previous investigation findings, monitoring data, and decision documents, sampling locations have been selected within or immediately adjacent to portions of the study area with known contamination.

In addition to the work plans, a new standard operating procedure (SOP) has also been provided for incorporation. The SOP for electronic data deliverables concerns sample naming conventions and standards.

Please contact me at (412) 269-2051 or Mr. Matthew Bartman (Activity Coordinator) at (412) 269-2053 with any questions or concerns you may have regarding the work plans or monitoring program.

Sincerely,

BAKER ENVIRONMENTAL, INC.

Thomas F. Trebilcock
