Re: Contract N6247-89-D-4814
Navy Clean District III
Contract Task Order (CTO) 0323
Operable Unit (OU) No. 10 (Site 35)
Marine Corp Base (MCB), Camp Lejeune, North Carolina

Dear Mr Sugg,

As per our recent telephone conversation on September 4, 1998, Baker Environmental, Inc. (Baker) is preparing to install five two-inch diameter groundwater monitoring wells in the wetland immediately adjacent to Camp Geiger, MCB Camp Lejeune. The wells will be located between the soon-to-be-constructed US Highway 17 Bypass and Brinson Creek. These wells are being installed to monitor the possible migration of groundwater contamination that resulted from previous releases of fuel and solvents at Camp Geiger.

To mitigate damage to the Brinson Creek wetland Baker will install an access-way made out of plywood. In addition, a manual tripod drilling system will be used to install the monitoring wells in lieu of a truck-mounted drilling rig. All drill cuttings will be removed from the Brinson Creek wetland area. Upon completion of drilling operations the plywood access-way will be dismantled and removed.

In our phone conversation, you indicated that drilling operations conducted as described above met with your approval and no written permit would be required. If you should have any additional questions concerning these drilling operations please call me at (412) 269-2024 or Dan Bonk, Baker's Project Manager, at (412) 269-2063.

Thank you for your cooperation in this matter.

Sincerely,

BAKER ENVIRONMENTAL, INC.
